

Anand Kumar K

Java Full Stack Developer | Spring Boot | Microservices | React.js

Bangalore, Karnataka, India

Phone: +91 8722291004 | Email: anandkumarat007@gmail.com

GitHub: github.com/AnandAK07 | HackerRank: anandkumark055

Professional Summary

Java Full Stack Developer with 4 years of experience in building scalable enterprise applications using Java, Spring Boot, Microservices, React.js, and SQL databases. Skilled in RESTful API development, Microservices architecture, frontend development, and database optimization using Hibernate, JPA, MySQL, and PostgreSQL. Experienced with Docker, Apache Kafka, AWS, Git, Maven, and Agile Scrum methodologies.

Core Technical Skills

Backend: Java 8/17, Spring Boot, Spring MVC, Spring Security, Microservices, RESTful APIs, Hibernate, JPA

Frontend: React.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI (MUI)

Database: SQL, MySQL, PostgreSQL

DevOps & Tools: Git, GitHub, Maven, Postman, Docker, AWS (EC2, S3), Apache Kafka

Testing, Debugging & Other Tools: JUnit, Debugging, Performance Optimization, Chrome DevTools

Methodologies & Practices: Agile Scrum, SDLC, MVC Architecture, Git Workflow, Microservices Architecture

API & Security: REST API Integration, API Documentation, JWT Authentication

Professional Experience

Senior Java Full Stack Developer

VISIONQUEST SOLUTIONS PRIVATE LIMITED | Bengaluru, India | Aug 2025 – Present

Project: Digital Banking Platform

Enterprise banking application for managing customer accounts, transactions, payments, and financial operations using Microservices architecture.

Key Contributions:

- Developed scalable enterprise applications using Java 17, Spring Boot, and Microservices architecture
 - Built and integrated RESTful APIs for customer, transaction, and workflow management modules
 - Implemented Hibernate and JPA for ORM mapping and database transaction management
 - Performed MySQL query optimization and database performance tuning to improve query execution efficiency
 - Integrated Apache Kafka for asynchronous communication between distributed services
 - Supported Docker-based deployments and AWS cloud environments
 - Participated in code reviews, deployment support, and production issue resolution in an Agile Scrum environment
-

Software Engineer

Pazago Technologies Private Limited | Mumbai, India | Dec 2024 – Jul 2025

Project: Logistics & Workflow Management System

Internal logistics and workflow management platform for handling order processing, inventory tracking, and operational workflows.

Key Contributions:

- Developed scalable web applications using Java, Spring Boot, React.js, and PostgreSQL
- Built RESTful APIs and backend services for logistics and workflow management systems
- Worked on PostgreSQL schema design and SQL query optimization
- Integrated frontend applications with backend APIs for seamless data flow
- Improved application performance by optimizing backend services and frontend component rendering
- Managed version control using Git and build automation using Maven

Software Engineer

THOUGHTPROCESS SOFTTECH PRIVATE LIMITED | Hyderabad, India | Jun 2022 – Nov 2024

Project: Fintech Credit Management Platform

Financial services platform for managing credit processing, loan workflows, customer onboarding, and payment operations.

Key Contributions:

- Developed scalable enterprise applications using Java, Spring Boot, and Microservices architecture
- Built and maintained RESTful APIs for fintech and credit management platforms
- Implemented backend services using Hibernate and JPA for database transaction management
- Developed responsive frontend modules using React.js, JavaScript, HTML5, and CSS3
- Worked on MySQL database design, SQL query optimization, and performance tuning
- Integrated frontend applications with backend APIs and handled end-to-end data flow

Project: Core Banking Transaction System

Banking transaction platform for secure account and transaction processing using Spring Boot and Microservices.

Key Contributions:

- Developed backend microservices and RESTful APIs for banking operations
- Built secure APIs for transaction processing and customer account management
- Implemented database operations using JPA, Hibernate, MySQL, and SQL queries
- Improved API response time by 30% and optimized SQL query execution
- Worked on frontend enhancements using React.js and reusable component architecture

Education

Bapuji Institute of Engineering and Technology

B.E. in Mechanical Engineering | 2019 – 2022

Achievements & Interests

- Developed enterprise applications across banking, fintech, and logistics domains using Java, Spring Boot, React.js, and Microservices architecture
- Improved API response time and SQL query performance through backend optimization and efficient database handling
- Interested in System Design, Scalable Backend Development, Microservices Architecture, and Cloud Technologies
- Passionate about learning modern Java technologies and enterprise application development
