PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience building scalable web applications using React.js, Angular, Node.js, Python/FastAPI and Java. Skilled in REST API integration, responsive UI development, WebSockets/WebRTC, JWT, OAuth authentication, and database management using PostgreSQL, MySQL, and MongoDB. Experienced in CI/CD, AWS deployments, and microservices for delivering enterprise applications in Agile/Scrum environments.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Angular, TypeScript, JavaScript (ES6+), HTML, CSS, Tailwind CSS

UI Libraries: Material UI (MUI), Reusable Component Libraries

State Management: Redux, Context API, Efficient State Patterns

Backend: Python, Node.js, FastAPI, REST APIs, Webhook Integration, MongoDB, SQL

Real-time: WebRTC, WebSockets, Media Streaming, Session Management

Auth & Ops: OAuth, Token-based Auth, Lazy Loading, Code Splitting

Tools: Git, Netlify, Vercel, AWS, Agile Methodology, Microservices architecture, i18n Multi-language

WORK EXPERIENCE

Full-Stack Developer

Apr 2025 – Present

ThoughtProcess SoftTech Pvt. Ltd. — Hyderabad

ThoughtProcess SoftTech Pvt Ltd: A technology solutions company focused on developing scalable software applications, enterprise platforms, and digital transformation solutions for businesses across various industries. The company emphasises modern web technologies, product engineering, and customer-centric software development to deliver efficient and high-performance digital solutions.

Project:

Loans Service Platform: Contributed to the development and enhancement of a financial services platform focused on loan management workflows, improving platform usability, system stability, and API-driven operations.

Key Contributions

- Developed modern pages and features using Vue.js and React.js, ensuring user-friendly interfaces across devices.
- Implemented backend logic and APIs using Python and Java to support application workflows.
- Implemented JWT/OAuth-based authentication and role-based access control.
- Integrated front-end components with backend services to enable seamless data flow.
- Optimised API-driven financial workflows to ensure secure and efficient transaction processing.
- Integrated payment workflows with U.S.-based banking systems using OrbePay APIs.
- Developed and enhanced secure payment processing features for loan management workflows.

Implementation Engineer

Mar 2023 – Mar 2025

ShikshaLokam.org — Bangalore

ShikshaLokam: A non-profit education technology organisation dedicated to strengthening public education systems in India through scalable digital platforms, leadership development programs, and data-driven solutions. The organisation collaborates with governments, educators, and communities to improve learning outcomes and educational impact at scale.

Projects:

Diksha (Sunbird) Learning Platform

- Built responsive UI components using Angular for curriculum-based learning modules.
- Integrated analytics dashboards to track user engagement and learning behaviour.
- Improved usability and accessibility across devices and browsers.

MI Dashboard

- Developed Angular dashboards integrated with Node.js and Python APIs to visualise KPIs and program analytics.
- Automated reporting workflows and improved operational visibility for stakeholders.

Template Validation & Solution Upload Portals

- Designed React.js interfaces with real-time data validation using Java.
- Reduced deployment errors and improved template validation efficiency.
- Implemented structured SQL queries for validation and reporting processes.

Self-Creation Portal

- Designed intuitive user interfaces enabling users to create and publish content independently.
- Improved overall workflow efficiency and user adoption.

MentorED Platform

- Contributed to a mentorship tracking platform for monitoring teacher progress and engagement.
- Developed reusable UI components to improve scalability and maintainability.

Key Contributions

- Collaborated with designers to create mockups and prototypes for responsive and user-friendly web applications.
- Designed and implemented Angular and React based user interfaces and built Node.js-based backend APIs, integrating applications for seamless data flow and functionality.
- Optimised frontend performance with code splitting, lazy loading, and efficient state management.
- Wrote optimised SQL queries to support analytics dashboards and reporting tools.
- Performed data validation, cleansing, and structured query writing to support internal tools
- Ensured seamless functionality across major browsers, including Chrome, Firefox, Safari, and Edge.
- Performed rigorous testing to resolve bugs, improve performance, and ensure compatibility.
- Reduced manual processing time by 60% by developing an automated analytics dashboard.
- Streamlined implementation workflows through automation scripts, reducing manual effort by 70%.
- Coordinated with designers, developers, and project managers to deliver features on schedule.

Software Development Engineer

Apr 2022 – Nov 2022

Sublime Data Systems Pvt Ltd — Bangalore

Sublime Data Systems: A digital product development company specialising in web and mobile application development, AI-powered solutions, and scalable software products for businesses across multiple industries. The company focuses on building secure, user-centric, and high-performance digital solutions using modern technologies and agile development practices.

Project:

Employee Management System: Developed a scalable and feature-rich employee management platform using React.js, Redux, and Tailwind CSS to streamline employee operations, user management, and workflow processes.

Key Contributions

- Created responsive design layouts using JavaScript, CSS, Redux, and Tailwind.
- Crafted reusable components to streamline application scalability.
- Implemented user authentication and role-based access control.
- Worked as part of a team to deliver client-side scripting and ensure a seamless user experience.

KEY ACHIEVEMENTS

- ✓ Improved application load time through code splitting, lazy loading, and efficient state management patterns.
- ✓ Delivered all projects within sprint deadlines across Agile development cycles with consistent quality
- ✓ Template Validation Portal: Streamlined content template deployment by implementing real-time validation and an accessible Angular interface, reducing manual review efforts by 60% and ensuring error-free templates.
- ✓ Solution Creation Portal: Developed an intuitive, role-based solution creation portal that simplified deployment workflows, reducing onboarding time by 40% and enhancing security through audit logging.
- ✓ Contributing to Open-Source projects and actively contributing to the tech community by mentoring junior developers, helping them build confidence and overcome coding challenges.

EDUCATION

Bachelor of Computer Applications

2022 – 2025

Sarvepalli Radhakrishnan University, Bhopal
